PERSONAL PROFILE

As a seasoned professional with over 3 years of experience, I specialize in software engineering and programming, with a strong focus on problem-solving. My expertise includes proficiency in frontend design , coupled with web application development skills using languages such as JavaScript and Flutter (Dart).

Known for my strong supervision and organizational skills, I excel as a team player, adapting seamlessly to changes and capable of working autonomously when needed. Fluent in five languages, I am passionate about championing diversity. Approachable and personable, I pride myself on quick learning and continuous adaptation to new challenges in the dynamic field of software engineering.
